

Narayan Rathi

Co-founder & Chief Executive Officer, Automate Accelerator | Melbourne, Australia

Before founding Automate Accelerator, Narayan was part of the leadership team that built Time Telecom into the fastest-growing company in Australia - ranked No. 1 on the 2012 BRW Fast 100 - and then sold the business to ASX-listed M2 Telecommunications Group. The same operator discipline now sits behind Automate Accelerator's growth partnerships.

BRW FAST 100 (2012) Ranked No. 1 - Australia's fastest-growing company	3-YEAR REVENUE GROWTH 375.21% (to FY2011-12)	REVENUE AT RANKING \$51.13 million
EXIT Acquired by ASX-listed M2 Group (2012)	CUSTOMERS AT ACQUISITION ~30,000 business & residential	FURTHER RECOGNITION Deloitte Technology Fast 50 Australia

The Time Telecom story

Time Telecom was a Melbourne-based telecommunications provider serving small and medium business and residential customers Australia-wide. Through sustained, disciplined growth it reached \$51.13 million in revenue on the back of 375.21% revenue growth over three years - enough to top the 2012 BRW Fast 100, the Australian Financial Review / BRW ranking of the country's fastest-growing established companies. In 2012 the business was acquired by M2 Telecommunications Group (ASX: MTU) - then one of Australia's largest challenger telcos - through its subsidiary Southern Cross Telco, in a deal reported at around A\$18.5 million, bringing across roughly 30,000 customers. M2 later merged with Vocus in 2016.

Continuing the growth track record

Narayan stayed in the high-growth telco sector, where the group also earned recognition among Australia's fastest-growing technology companies in the Deloitte Technology Fast 50, and the follow-on venture Smart Business Telecom placed 4th on the BRW Fast Starters list in 2015. In 2021 he founded Automate Accelerator, applying the same buyer-clarity and operating discipline to help Australian B2B companies build serious outbound growth channels.

What he does today

Narayan is co-founder and CEO of Automate Accelerator, an Australian-owned B2B growth partner. AA helps companies reach specific buyers through clear buyer definitions, checked decision-maker data and human-led outreach - measured by real replies and conversations, not activity. He stays close to strategy, offer positioning and the first version of every new client brief.

Sources & screenshots to capture

I could not embed live screenshots from this environment (outbound image downloads are blocked here), so below are the primary links. Open each, screenshot the highlighted figure, and place the image beside the matching claim in the one-pager.

Verification notes - please confirm before sending:

1. Your exact role/title at Time Telecom (public records list 'Senior Director, Operations'). Adjust the 'leadership team' wording to match.
2. Deloitte Technology Fast 50: exact year/rank not verifiable in public sources. The one-pager only says 'recognised in' (no rank). If you have the certificate/year I'll make it specific; otherwise consider removing it to stay fully proof-honest.
3. Award logos: your launch checklist flags confirming whether BRW / Deloitte / M2 logos can be used. Get sign-off before adding logos to a client-facing version.
